

Gas condensing boiler
Output: 150 – 570 kW

R600 EVO

Compact, powerful performance

R600 EVO – Flexible for every application

A new standard

The R600 EVO represents a significant step forward in heating technology. With extremely flexible configurations, clever design and a range of models available, the boiler is perfect for a variety of commercial applications. It is time to discover the next generation of floor standing boiler.

Comprehensive control features

A clear text display with integrated master-slave cascade functionality (up to 8 boilers) makes commissioning simple. Plus, upgradable module capacity provides straightforward connections for additional heating zones, solar system or external heat sources.

Compact dimensions

All models are designed to pass through standard 760 mm wide doors. The range comprises 7 models with 2 widths.

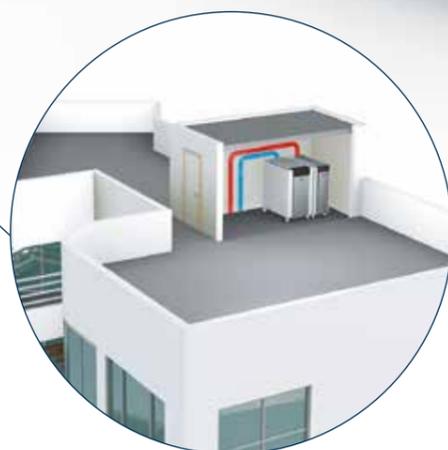

Flexible configurations

The inspection glass and ignition electrode can be fitted on either side of the boiler, allowing a more flexible boiler positioning on site.

Wider applications

With an 8 bar max. water pressure, the boiler is compatible with higher buildings without the need for hydraulic system separation. Plus, a 30K flow/return temperature differential allows easier integration with district heating systems while maintaining optimum efficiency.

Lightweight construction

By utilising low water content technology, the boiler can be easily installed on a rooftop - while also delivering superb response times and reduced running costs.

Easy transportation

The boiler is supplied with cargo wheels, allowing it to be easily manoeuvred on site. After positioning, the boiler can be levelled and lifted from its cargo wheels by adjusting the feet.

Simple commissioning

An integrated flue gas damper and rear flue connection provides an installer-friendly arrangement.

R600 EVO – Designed for challenging environments

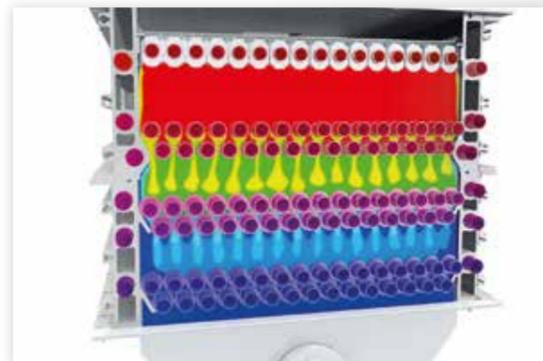

The burner

R600 EVO's advanced burner design provides the most technologically advanced and best performing unit on the market.

Unique premix-burner system

A fully modulating, water-cooled cold flame burner utilises a one-of-a-kind system to provide reliable and robust performance.

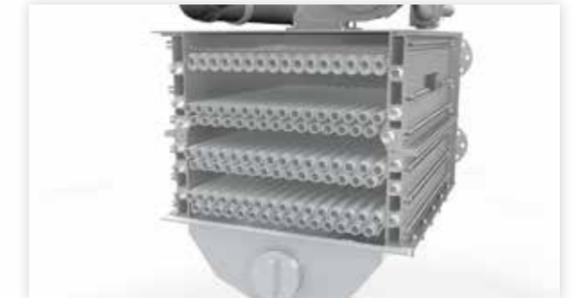

Low emissions

The water-cooled cold flame burner and the optimised combustion zone achieve extremely low NOx and CO emissions, which already comply with NOx class 6 requirements.

The heat exchanger

R600 EVO has a stainless steel heat exchanger built for challenging working conditions. It is specifically designed for optimised efficiency and performance during its entire lifetime.

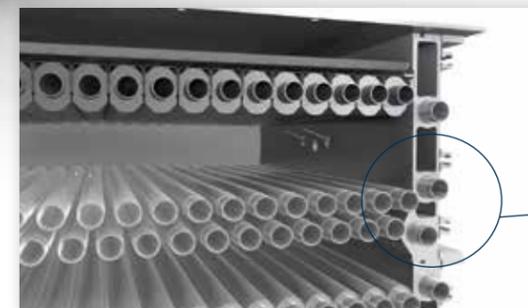

Lifetime high efficiency

By combining the unique premix-burner/heat exchanger system with the optimised controls, R600 EVO provides impressive lifetime high efficiencies of up to 110 %.

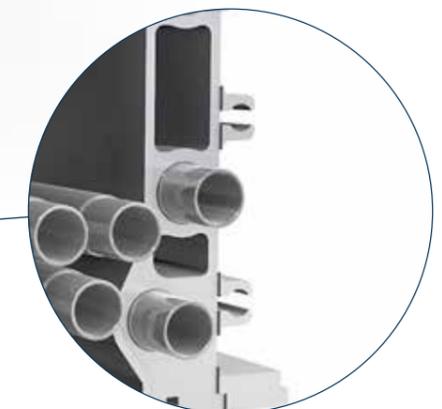

Stainless steel laser welded fin tube

Advanced robot laser welding technology ensures superb heat transfer between the fins and the tube.

Water cooled combustion chamber

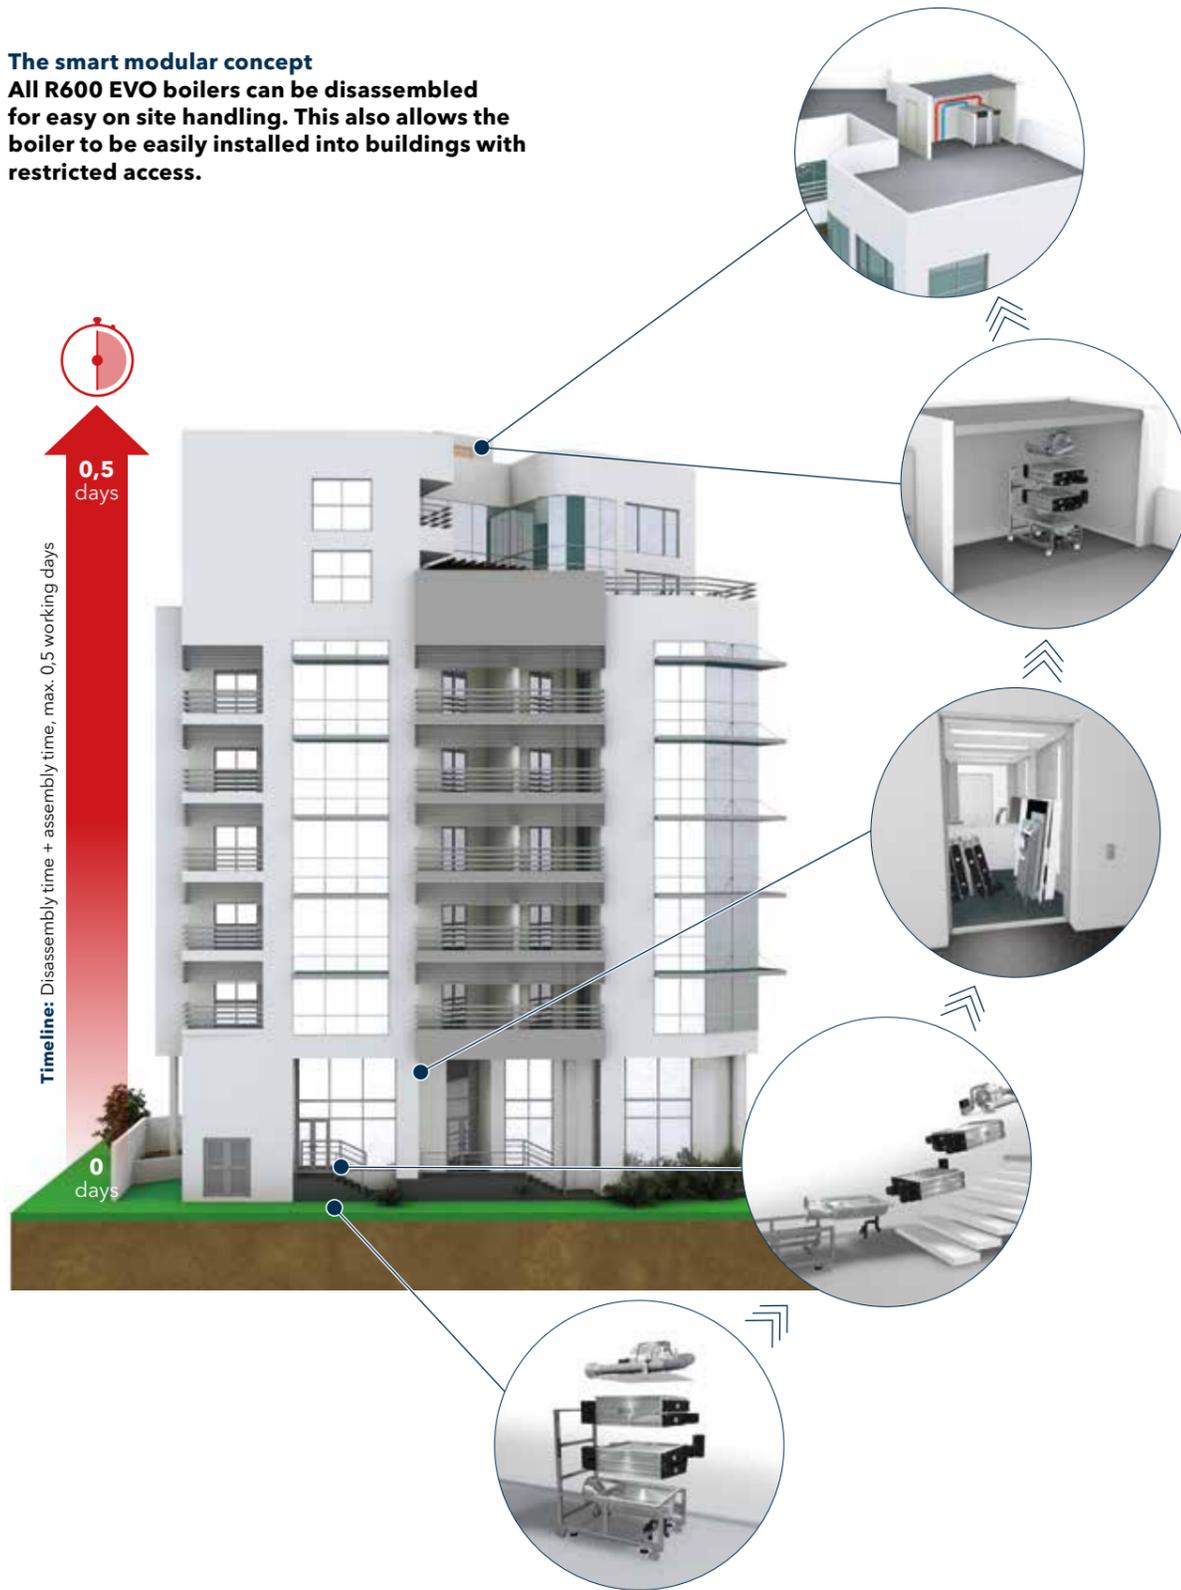

A carefully engineered hydroforming process fixes the cooling tubes inside the sidewalls, providing the highest possible thermal conductivity.

Easy installation

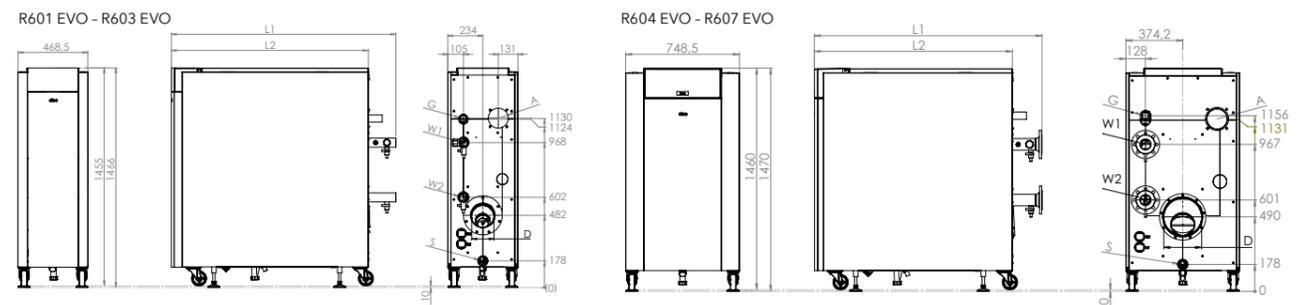

The smart modular concept

All R600 EVO boilers can be disassembled for easy on site handling. This also allows the boiler to be easily installed into buildings with restricted access.

Technical data R600 EVO

R600 EVO		R601 EVO	R602 EVO	R603 EVO	R604 EVO	R605 EVO	R606 EVO	R607 EVO
Nominal heat output at 80/60 °C	kW	142,3	190,4	237,6	285,7	381,3	476,7	540,2

Rendamax - quality comes first

Rendamax is a leading manufacturer of high quality central heating and hot water equipment. Represented by dedicated companies/distributors worldwide, all products in the company's range offer substantial benefits, including superb efficiencies, ultra-low energy consumption and the lowest environmental impact.

By creating long-term relationships and remaining at the forefront of boiler technology, Rendamax is committed to adding value for its customers, employees and shareholders alike.

Discover the full range of gas condensing commercial boilers

R40 EVO

- Wall mounted
- 6 models (60 - 140 kW)
- Cascade up to 1,1 MW
- Pre-mix modulating
- Highly efficient (up to 110 %)

R600 EVO

- Floor standing
- 7 models (150 - 570 kW)
- Pre-mix modulating
- Highly efficient (up to 110 %)
- Stainless steel heat exchangers

R3456 EVO

- Floor standing
- 29 models (650 - 2.000 kW)
- Highly efficient (up to 109,7 %)
- Stainless steel heat exchangers
